

# Susan Bower, MBA, BSN, RN, EDAC

## Program Planner

Susan excels at helping healthcare providers operationalize their strategic objectives: solving process and quality issues, engaging stakeholders and integrating human experiences into operations planning and design.

With nearly three decades of healthcare experience—including 15 years as a clinician—Susan brings an enterprise-level focus to medical planning and daily operations. She not only leads planners and designers in early project phases, translating business goals into design; she also remains integrated with the team through project delivery and transition management, to ensure the facility operates at the highest levels of performance.
