

Chris Vishey, MBA

Strategist

Chris bridges the gap between strategic thinking and facilities planning by leveraging data to identify emerging healthcare trends and forecast the future needs for his clients.

By integrating Lean practices, Chris strives to identify opportunities and implement operational enhancements that improve the care delivery process. In the ever changing and complex world of healthcare, Chris transparently communicates what healthcare systems can do today to maximize long-term asset longevity and performance. His 11 years of experience in operational modeling, forecasting clinical services and testing creative solutions, make him a key resource for design teams.
